The above amount of $883,787.23, resulting from the actual business of the year, remained in the Treasury in conformity with the requirements of Chap. 15, Sect. 10, of the Revised Ordinances; and an order of the City Council of April 30, 1884, provided that it be used towards meeting the appropriations for the financial year 1884–85.

The annual appropriation order of the City Council provides that no money shall be drawn for by the Mayor and Auditor, or be paid by the Treasurer, unless the same has been previously appropriated by a special vote of the City Council; hence the necessity of applying to the City Council for additional means, if from any cause an *original appropriation* falls short. The additional means thus asked for can only be furnished by an *authorized* transfer from some existing appropriation which can spare it, or by a *specific* loan. In this manner the City Council retain a *knowledge and control* of all the expenditures, as none can be made unless an appropriation for the same is expressly authorized by them.

## PUBLIC WORKS.

HENRY M. WIGHTMAN, *City Engineer.*

WATER-WORKS. — *Sudbury-river Reservoirs.* — During the year the Sudbury-river water-shed has yielded 14,620,500,000 gallons, equal to a daily average of 40,056,200 gallons, and the Sudbury-river works have furnished 8,455,000,000 gallons for the supply of the city, as follows: —

| | | | |
|---|---|---|---|
| January, | 733,400,000 | July, | 754,300,000 |
| February, | 597,800,000 | August, | 640,900,000 |

| June, | 631,600,000 | December, | 536,800,000 |

*Lake Cochituate.* — The water-shed of Lake Cochituate has yielded a daily average supply of 9,079,700 gallons, while 12,962,300 gallons have been drawn from the lake for the supply of the city.

*Mystic Lake.* — The Mystic water-shed has yielded 4,351,600,000 gallons, equal to a daily average of 11,922,300 gallons.

*Consumption.* — The average daily consumption from the combined works, for each month, has been as follows: —

| | From Sudbury and Cochituate Works. | From Mystic Works. | Total. |
|---|---|---|---|
| January | 34,715,500 | 8,369,600 | 43,085,100 |

| December | 30,174,200 | 6,771,500 | 36,945,700 |
| Averages | 32,836,900 | 6,819,200 | 39,656,100 |

The consumption from the Sudbury and Cochituate works shows an increase of 2.7 per cent., and that of the Mystic works 3.7 per cent., over that of the year 1882. The consumption of the first nine months shows a large increase, when compared with the corresponding months of the previous year, while the remaining months exhibit a decrease. This reduction in the consumption is due to the saving effected by the stoppage of waste, and to the effect of the cautionary notices issued on account of the low state of the supply.

The daily average consumption per head of population has been 91 gallons from the Sudbury and Cochituate works; 79.3 gallons from the Mystic works; and 88.7 gallons from the combined supplies.

## Water-Works and the Improvement of the Water Supply.

*Farm-pond Conduit.* — This conduit is to form the connecting link between the two sections of the Sudbury-river conduit, which now ends on opposite sides of Farm pond.

A contract for the pile and trestle work foundations was made October 9, 1883. The work under this contract was completed in May.

A contract was made January 17 for filling the foundations with gravel. This contract is still being carried out, and will not finally be completed until July.

As soon as this filling is completed a contract for the masonry conduit will be made; but, owing to unforeseen delays in carrying out the preliminary contracts, the conduit will not probably be completed the present year.

The appropriation for the entire work is $160,000.

*Basin No. 2.* — The work of deepening the shallow flowage in this basin has been completed, and a large amount of loam and muck has been removed from areas below the shallow flowage limit.

The quantity of material removed has been about 130,000 cubic yards.

The appropriation is $80,000.

*Basin No. 3.* — The excavation of this basin, for the purpose of eliminating the shallow flowage, was commenced late in the season of 1883, and considerable progress was made at the Southboro' end. The work was interrupted by the advent of extreme cold weather, and cannot be resumed probably until late in the season of 1884, as the basin will not probably be empty before that time.

The appropriation for this work is $125,000.

*Basin No. 4.* — A large force of men and teams has been employed on the various portions of the work at this basin during the past season.

The railroad plant has been increased to two steam shovels, four engines, and one hundred dump cars.

A large amount of material has been moved by the railroad plant, and deposited either on the embankment or the waste-dump, or delivered to the Boston & Albany Railroad Company, for transportation to the Back Bay park.

The quantity of material used in forming the embankment from September 1 to November 15 aggregated 44,500 cubic yards, and of this amount 30,000 cubic yards were transported by rail and the remainder by teams.

The quantity of muck and poor loam deposited on the

waste-dump amounts to 35,000 cubic yards. Judging from the areas yet unstripped of loam and muck, it will not be difficult to complete this work during next season.

The transportation of loam to the Back-Bay park was commenced November 7, and is progressing at the rate of about 600 cubic yards per day.

Considerable work has been done in deepening the shallow flowage of this basin; and, as there is not a very large area to be treated, it will be easily completed during the present season. About 2,000 lineal feet of the shores have been graded, so as to give 8 feet of water at the foot of slopes of about 3 horizontal to 1 vertical.

All the masonry of the gate-chamber and overflow is completed, and all the work of this character remaining to be done consists of the construction of a small building for the protection of the gates and machinery in the gate-chamber.

Public Park, Back Bay. — *Filling.* The filling done during the year has been for the purpose of back-filling the Boylston-street Arch and the Embankment wall, and for grading the slopes between Boylston street and the cross-drive from Westland entrance.

*Excavation.* — The excavation of the water-way has been continued, about 3,600 lineal feet of shore having been formed with gravel and the channel excavated between the banks.

*Boylston-street Arch Bridge.* — The back-filling of the arch was completed, and the centering removed in November. The entire work on this bridge has been completed except the pointing.

*Embankment Wall.* — This wall has been entirely completed except small portions of the wing-walls of the Boylston-street Arch Bridge. The drive-way in rear of the wall has been graded.

*Granite Curb and Fence.* — The curb and granite posts were in place a year ago. During the past year the iron fence has been completed.

*Beacon-Entrance Bridge.* — A wrought-iron fence has been built upon this bridge during the year.

*Grading and Loaming.* — The work of grading the slopes between the drives and the water-way was continued during the last season, and on November 7 the Boston & Albany Railroad Company began to deliver loam. The surfaces that were graded to the sub-grade have been covered with the loam, and the portion north of Boylston street has been planted with trees, shrubbery, etc. The remainder of the loam has

been deposited in large piles as near as possible to the points where it will be needed.

*Covered Channel, Stony Brook.* — The gate-chamber was completed during the year with the exception of the windows. On January 1 the operation of the improved system of sewerage diverted the sewage which formerly was discharged through this channel, and the channel is now used, as was contemplated when the improvement of this territory was begun, viz., for the discharge of the ordinary flow of the brook, with the gate-chamber acting as an overflow in times of freshet.

*Covered Channel, Muddy River.* — The channel has been completed, and work is now in progress on the gate-chamber which will connect the Muddy-river basin with this covered channel.

Improved Sewerage. — The work covered by this appropriation was sufficiently advanced by the first of the present year to permit its being put in operation, and since that date a large part of the sewage of the city has been discharged at Moon Island.

During the past year two additional pumping-engines, making four in all, have been set up ready for service, the boiler and coal houses at the pumping-station have been finished, and the permanent engine-house advanced towards completion. The tank sewers and pier leading to the tunnel, the tunnel under Dorchester Bay, the out-fall sewer to Moon Island, the reservoir at the island, and the outlet sewers into the sea, have also all been practically completed.

In all about four miles of sewers were built during the year; and about one and one-half miles additional, to complete the system as proposed, are now under way.

## PUBLIC BUILDINGS.

Built under the direction of C. J. Bateman, late *City Architect.*

Engine-house No. 32. — This house is situated on Bunker Hill and Charles streets, Charlestown District, and is a two-story building, with basement and hose tower, built of face-brick and trimmed with brown sandstone. The first story contains an engine-room, 40 by 36, and stable in rear, 36 by 24, with 7 stalls. In the second story are a dormitory, billiard-room, captain's room, lavatory with baths and water-closets, and hay-loft. The basement contains the heating apparatus, coal and wood bins, drying-room, hose-tank, etc. The tower for drying hose is utilized as a

ventilating shaft, connected with stables and manure-pit. The rooms are finished in pine, neatly grained, painted walls and frescoed ceilings, except the stable, which is sheathed in hard pine throughout.

The building contains modern appliances for steam-heating and ventilation, and is furnished with sliding pole, electrical mechanism for operating doors, and other arrangements for facilitating the work of the Fire Department.

Robert R. Mayers, mason, and John French, carpenter, were the contractors. The total cost of the building and land was $29,888.54.

Addition to Auburn Primary School, *Brighton.* — This addition contains one school-room on first and one on second story, with wardrobes and teachers' rooms. The exterior conforms to the old building in construction, making complete a four-room wooden school-building, with entrances on either side. The contractor was John W. Clark, and the addition cost $5,049.11.

Addition to East Boston High School. — This is a six-room addition to the old Lyman School-house, the school-rooms being grouped in two wings, three stories in height, on the Wesley-street side of the old building, the connection between the wings containing the corridors, chemical rooms, master's room, wardrobes, and water-closets.

In the basement are the boiler and coal rooms, and two large play-rooms.

Each wing has an entrance from the yard, and the addition is connected with the hall of the old building in the upper story. The exterior is of face-brick, with brown-stone trimmings, conforming with the architecture of the old structure. The building is furnished with steam heat, on both direct and indirect systems, ventilating pipes, water-closets and bowls, annunciators and other conveniences, and the floors are lined with fire-proof material throughout. It is very near completion.

Mason, Edward Lynch; carpenter, P. P. Kelley.

Completion of the George Putnam School. — This was the construction of a wing to the Egleston-square Grammar School-house, a part of the original design of the building, which is described in the Report for 1881–82. It consists of three school-rooms and a basement play-room, and is built in accordance with the original plans. Additional steam-heating apparatus has been introduced.

Gooch & Pray, masons; John Rawson, carpenter.

Breed's Island Primary School-house. — This is a two-room wooden school-house, with basement play-room, erected

on Elm street, Breed's Island. The design and general construction is similar to the Quincy-street School, Dorchester. A. & J. McLaren, builders. Total cost of land and building, $8,940.62.

Harbor-View-street Primary School-house. — The Harbor-View-street School-house is a wooden building, with four school-rooms and two basement play-rooms, the school and play-rooms being in two wings, which project diagonally from a rectangular main building, the latter containing the corridors, stairs, dressing and ante-rooms. This arrangement gives light on three sides of each room. The building is neatly finished in pine, grained, with walnut stair finish, and is provided with heating and ventilating apparatus, water-closets and urinals, sinks, etc. John Rawson, builder.

O-street Primary School-house. — This school-house is situated on the corner of O and Fifth streets, South Boston. It is a two-story structure, with a high basement, each story containing four school-rooms, with a large clothes-room to each, and ample corridors; also a teachers' room and toilet-room in the upper story. A feature of the design is the construction of all the school-rooms precisely alike, with windows only at the left and in rear of the scholars as seated. Each room is enclosed by brick walls and the floors lined with fire-proof material. Heat is furnished by steam apparatus by direct and indirect systems, and each room has an independent system of ventilation. The basement contains three light, dry play-rooms, with privies and urinals, and boiler-room, coal and storage rooms. The exterior is constructed of face-brick, with granite and brown-stone trimmings. The roof is finished with four dormers, and two towers of copper, receiving the ventilating shafts. The entrances are from both streets, and the building is surrounded by ample yard-room. The work will be soon finished.

# LAMP DEPARTMENT.

The whole cost of lighting the streets of the city during the financial year 1883–84 was $496,915.91, against $454,168.71 in the previous year. On the 15th of December, the city was lighted with 9,623 gas, and 2,619 oil lamps, being a decrease of 432 gas, and an increase of 47 oil lamps, as compared with the previous year.

The lamps are located as follows: —

| | |
|---|---|
| In City Proper | 3,567 gas, and 126 oil. |
| In South Boston | 732 gas, and 495 oil. |
| In East Boston | 685 gas, and 234 oil. |
| In Roxbury District | 1,735 gas. |
| In Dorchester District | 1,081 gas, and 679 oil. |
| In West Roxbury District | 538 gas, and 794 oil. |
| In Brighton District | 418 gas, and 291 oil. |
| In Charlestown District | 802 gas. |
| In Brookline | 62 gas. |
| In Chelsea (Meridian-st. bridge) | 3 gas. |

The prices paid for gas in the public lamps to the several gas companies are: Boston, at the rate of $1.30 per thousand cubic feet; Roxbury and Charlestown, $1.87½; South Boston, East Boston, Chelsea, $2.00; Dorchester, West Roxbury, and Brighton, $2.25 per thousand feet.

The men who clean and light the gas lamps are paid at the rate of 1¾ cents per lamp per night, and have an average of 96 lamps each, except those in Roxbury, Dorchester, West Roxbury, and Brighton districts, who receive one dollar and seventy cents per day.

The underground *service*-pipes are laid and kept in repair by the various companies, under the direction of the Superintendent of Lamps, and at the expense of the city, without pecuniary consideration or profit to the companies.

The oil lamps, during the past year, have been lighted and cleaned by men employed by the Superintendent of Lamps, at the rate of 3¼ cents per lamp, per night, for this service.

The oil is purchased of the refiners at the lowest market rates.

In addition to the above there are 381 electric lights burning, under contract with Electric Lighting Companies of this city, at the rate of 65 cents per light per night. The city provides the iron posts, and the company furnishes the lamps and light.

[1] Included in the total valuation of 1865, and all subsequent years, was an assessment upon corporations chartered by the Commonwealth of Massachusetts, for real estate and machinery. The last item is taxed as personal, and is the only personal estate taxable by local assessors to a Massachusetts corporation.

| | Real Estate. | Machinery. | Total. |
|---|---|---|---|
| In 1881, 176 corporations were assessed, as follows: | $43,301,200 | $3,514,100 | $46,815,300 |
| " 1882, 175 " " " " | 45,754,600 | 3,275,300 | 49,029,900 |
| " 1883, 198 " " " " | 46,727,300 | 4,421,100 | 51,148,400 |

[2] The City of Roxbury, with a valuation of $18,265,400 real, and $8,286,300 personal, total $26,551,700, united with Boston in 1867, its valuation as a part of Boston taking effect in 1868. The aggregate valuation of Boston and Roxbury in 1867 was $471,497,800.

[3] The town of Dorchester, with a valuation of $12,826,200 real, and $7,489,500 personal, total $20,315,700, was annexed this year. Its valuation forms a part of the total valuation of Boston for 1870. The united valuation of the two municipalities for 1869 was $569,827,300.

[4] The City of Charlestown and towns of West Roxbury and Brighton were annexed to Boston in 1873, their valuation taking effect as a part of the city in 1874.

| | | | | |
|---|---|---|---|---|
| Valuation of Charlestown in 1873 was | $26,016,100 | real, | $9,273,582 | personal, total, $35,289,682 |
| " West Roxbury " | 16,254,350 | " | 5,894,250 | " " 22,148,600 |
| " Brighton " | 11,964,450 | " | 2,584,081 | " " 14,548,531 |

The valuation in 1873 of Boston and the municipalities that were annexed to the city in that year was $765,818,213.

[5] In consequence of the act of 1881, exempting money loaned on mortgage of real estate, the personal estate valuation receded, notwithstanding large gains were made upon the other items of personal estate.

The valuation of 1883 for personal property can be fairly increased $40,100,000, in addition to the amount given in the foregoing table for the value assessed by the Commonwealth at the rate of $14\frac{98}{100}$ per $1,000, upon shares of Massachusetts corporations, the property of residents in Boston. The State deducts from the value of each share the amount that represents the real estate and machinery locally assessed, and pays over to the city that proportion of the tax that represents the personal property of each corporation.

The valuation can be further increased, say $1,600,000 for bank stock, assessed at the several rates of the places where the banks are located, as the taxes are paid to Boston as assessments upon this class of property held by its citizens in Massachusetts banks located outside that city.

As the revenue from these two sources is always estimated before the amount to be raised by taxation is determined, the effect of the valuation of this property in reducing the rate of taxation upon the $682,432,617 assessed by the city is, as nearly as may be, the same as though its amount was included in the Assessors' aggregate, and the taxes were assessed by them.

The total valuation of personal estate which is assessed for all purposes for which the city must raise money by taxation can, for the year 1883, be put at $245,813,771.

In addition to the taxable valuation, churches, charitable, scientific, and literary corporations hold property exempt by law from assessments, as follows: Value of land, $11,427,300; value of buildings, $11,314,900. Total real estate $22,742,200; personal estate, $3,448,500. The City of Boston holds in its corporate capacity (not assessed for city taxes) $17,780,041 of actual assets available for the payment of liabilities, and $39,592,813 nominal assets, the character of which is shown in the following copy of the return of the Assessors as of May 1, 1883, to the State Treasurer: —

Large amounts of property, held by residents of or located within the limits of Boston, are by law or judicial decisions exempt from all assessments, the principal items being the real estate of the United States and the Commonwealth, United States bonds, money loaned upon mortgage of real estate, imported goods in original packages, the furniture of a family below $1,000 in value, etc. The proportion of the deposits in the savings-banks of Massachusetts ($252,607,593, Oct. 31, 1883) belonging to the residents of Boston is unknown, as the Commonwealth assesses the amount and retains the entire tax for State revenue. But the total valuation of Boston for property that, by existing laws, must be estimated for assessment or for the information of the Legislature is as follows: —

[1] Chapter 299 of the Acts of the year 1879 requires that the State Tax and County Tax shall be assessed on polls, *provided* that each of such taxes shall not exceed the sum of one dollar (two dollars for the entire tax upon each poll). The excess above the amount so raised must be assessed on property. In the above table the sums stated in the columns of STATE TAX and COUNTY TAX, respectively, are the whole amounts required to be raised, and the figures in the columns of RATE show the amount per $1,000 for which *property* was assessed to make up the deficiency after the polls had been assessed at one dollar each for State and County purposes.

The principal cities of the United States have each their own system of

SPECIAL ASSESSMENTS.

That of Boston, previous to the enactment of Chapter 174 of the Acts of the year 1866 (generally known as the betterment law), consisted of assessments upon abutters, for the cost of sidewalks for foot-passengers upon the public streets, where the owners of estates have failed to construct them[1]; and for three-quarters the expense of construction of new sewers, the city assuming one-quarter the cost. The Act of 1866 enables the city to assess upon the owner *one-half the amount* that his estate has been *benefited* by the laying out, widening, or change of grade of any street, after the city shall have first paid all the land and building damages and the full cost of the work. The following table exhibits the character and amount of these special assessments from the year 1864: —

A table compiled from official reports shows the valuation, amount, and rate of taxation of the city of New York for twenty years: —

[1] Previous to 1872 the whole cost of sidewalks was assessed upon abutting estates, but Chapter 303 of the Acts of that year limits the assessment to one half of the cost of construction.

[2] Full cost assessed to 1872. Half cost subsequent to that date.

[3] The entire betterment assessment of 1879 was laid by the Park Commissioners, under authority of Chapter 185 of the Acts of 1875, and was for the benefit to property in the vicinity of the new Public Park (106 acres) in the "Back Bay District."

[1] In January, 1874, the towns of Kingsbridge, Morrisania, and West Farms were annexed to the City of New York. Their real estate valuation of about $9,500,000, was increased by the authorities of New York City to about $23,000,000, in order that their assessments might be based upon the same scale of appraisement as the property of Manhattan Island. This increased valuation was included in the tax of 1874.

The figures given on previous page do not include the "special assessments;" they are not given, as there are no data as yet collected by which their detail and amount can be known. That such assessments are laid upon estates for purposes which in Boston are included in the expenditures met by the general tax levy is well known. That they are considerable in amount, there can be no doubt. That they are sometimes very heavy is evident by the following statement: The valuation, between 1868 and 1878, inclusive, of a lot of vacant land, bounded northerly by 97th street, easterly by Old Broadway, southerly by 96th street, and westerly by "the Boulevard," containing eight house-lots, with a total area of 20,200 square feet, ranged from $4,750 to $37,700, with an average of $24,664, the annual taxes averaged $652.81, or $26.70 per $1,000; and the special assessments for sidewalks, paving, grading, etc., and also for betterment by the location of certain public parks [some of which were four miles distant from the land assessed][1] averaged $1,282, or $52 for $1,000, a total average rate per annum of $78.70.

[1] For detail of these special assessments see Report of 1879-80, page 304.

For the years 1872 to 1876, inclusive, a special assessment was laid on each one thousand dollars as a "*Public Building Tax.*" The rate of this special tax for the years 1872 to 1876, inclusive, is included in the table above given, and is stated in detail in the foot-note upon the next page.

In the assessment of 1868, real estate, which had previously been assessed at a nominal valuation, was placed at the full market value, and assessments have since been made upon that basis. Several classes of personal property, which, under the law of Massachusetts, are included in the valuation of the cities and towns of the Commonwealth, are, under the laws of Pennsylvania, assessed exclusively for the benefit of the State. A "precept" issued to the assessors of Philadelphia by the Board of Revision of Taxes, subsequently to 1880, requires the assessment of "All mortgages, all money at interest, or owing by solvent debtors, upon promissory note, bond, judgment, or otherwise, not including bank notes. All money loaned or invested on interest in any *other State*, or in stocks or bonds of corporations of any *other State;* all furniture, including gold and silver plate above the value of $300; all pleasure carriages; all vehicles used for transporting passengers for hire, stating the kinds of vehicle; all annuities over $200, except those granted by this Commonwealth or the Federal government; all gold and silver watches; all horses, mares, geldings, mules, and neat cattle, over the age of four years." The personal property assessed on account of the municipality consists of furniture, horses, cattle,[1] and pleasure-carriages. An enactment of the legislature of 1868, first taking effect in the levy of 1869, requires a discrimination in the assessment of taxes upon real estate. The suburban portion of this municipality is assessed upon two-thirds, and the farming land upon one-half, of the rate levied upon the built-up portion of the city. The following table shows the operation of this law, and the amount of tax raised for the year 1884: —

[1] The ordinary levy for 1872 amounted to $9,841,413, and the tax-rate of $20 per thousand, but by an act of the Legislature an additional tax, at the rate of 80 cents on the thousand, was authorized for "public buildings." This tax amounted to $408,208.

[2] This amount includes the special building tax of 1873, amounting to $527,165.00 = $1.00 per $1,000.

[3] This amount includes the special building tax of 1874, amounting to $548,244.00 = $1.00 per $1,000.

[4] This amount includes the special building tax of 1875, amounting to $1,438,210.00 = $2.50 per $1,000.

[5] This amount includes the special building tax of 1876, amounting to $595,413.37 = $1.00 per $1,000.

[6] No amount assessed for the special building tax for 1877, and subsequent years.

It is claimed that from 1866 to 1875, inclusive, the appraisement of real estate has been for the market value. The personal estate liable to taxation under the laws of the State of Illinois is substantially the same as that assessed in Massachusetts.

The city of Chicago is made up of three districts or townships, viz., South, North, and West Chicago, which, in addition to their proportion of the city taxes, as shown in the above table, are assessed for their proportion of State and county taxes, and for certain local improvements, the city in its corporate capacity not being assessable for these purposes. Railroad property in Chicago is assessed in these several districts. The valuations upon which these assessments are made are reduced by boards of equalization to

[1] Includes railroads. (The amount for 1883, $3,190,854.)

[2] The city tax for this year was not extended on this assessment, in consequence of the court refusing judgment on delinquent real estate for 1874. The city taxes were therefore extended on the State and county assessment, and collected under the provision of the General Revenue of the State, it being optional with the City Council to either collect under the City Charter or under the General Revenue law. The valuation of 1875 on the State and county basis was, —

In addition to the State, county, city, and town taxes, Chicago has a system of special assessments, paid wholly by the real estate benefited by the special improvements, which, for the year ending January 1, 1883, were : —

## BALTIMORE.[4]

Population of Baltimore by United States census in 1860, 184,520 ; United States census in 1870, 267,354. Municipal

[1] After the great fire in October, 1871, a change in the law for making special assessments greatly reduced their amount. The items omitted were street and alley openings and widenings. In the assessment of 1875 these items again appeared in the list of special taxes, but omitted in 1876; they reappeared in 1887. Since 1875 no levy has been made for gas-service pipes, which formed for many years before that date one of the items of special assessment.

[2] No special assessments levied this year.

[3] The fiscal year which, in 1875, and previous to that date, ended on the first day of April, was in 1876 closed on the first day of January. The special assessments of that year cover a space of nine months only.

[4] For an extended statement of Baltimore assessments see Report of 1879 and previous years.

census in 1870, 283,070.[1] United States census of 1880, 332,190.

Assessments are made at the full cash value of property, real and personal, and for real estate are designed to cover a period of ten years.

The City and County of Baltimore have distinct municipal governments; and county taxes must be in addition to those imposed by city authority. By a law passed in 1878 corporations which had previously been exempt upon their property, because the shareholders were assessed the full value of the shares, were, in 1879, assessed for their real property where located, and the shares were taxed after allowance for real-estate assessments had been made. The effect is shown by an increased real and a diminished personal estate valuation.

[2] Under the laws of Ohio real estate is valued, for the purpose of taxation, once in ten years, the new valuations taking effect in 1860 and 1871. The gain of $17,000,000 upon this class of property, during the ten years preceding the assessment of 1870, and the gain of $6,000,000 for the same time preceding 1880, represent the improvement in old, and the value of new buildings. The real-estate valuation of the city, as made by the Assessors of 1870, was, in round numbers, $145,000,000.

This estimate was deemed excessive, and an act of the Legislature was obtained authorizing local boards to reduce it nineteen (19) per cent. The reduced valuation of the real estate of the city upon which the tax of 1871 was levied was placed at $123,427,888, and is the *official*, if not the *true*, valuation of the property. The figures of subsequent years indicate reduced values.

The table which follows shows the amount of taxes levied in this city since 1863, and the rate of tax per thousand for State, county and city purposes. The column marked "Delinquencies and Forfeitures" is thus explained. Unpaid taxes of former years are added to and form a part of the grand total of each year, until they are paid, or the several accounts are closed by a sale or otherwise.

The whole circuit of the lake, measuring at its verge when within two feet of high-water mark, is about 16 miles, and the city owns an average width of 5 rods around it, which is held free from taxation; also 1¼ acres at the outlet of Dudley Pond. In addition to this the city owns 23¾ acres in Wayland, 72¼ acres in Natick, and on the line of the aqueduct, — not including land appurtenant to the Chestnut-Hill and Brookline Reservoirs, nor land occupied by and necessary for the protection of the aqueduct, — 27¼ acres in Needham, 5¾ acres in Newton, 1½ acres in Brookline, which is taxable.

In effecting settlements for the land taken for the conduit and storage-basins, the Boston Water Board have in many cases purchased land not actually required for the above purposes.

The whole line of the Water-Works, extending from Lake Cochituate, and continuing through a brick aqueduct, iron pipes, and stone tunnel, 14⅛ miles, to a reservoir in Brookline, of about 23 acres of water surface, and 119,583,960 gallons' capacity.

The "Chestnut-Hill Reservoir," situated in the Brighton District, of the capacity of 730,000,000 gallons, with a water-surface of 123¼ acres. There are 212¾ acres in this whole property, the line of pipe from Chestnut-Hill Reservoir to the main near the Brookline Reservoir; also, the land under which are the pipes, being in amount about 6½ acres.

The "South Boston Reservoir," on the east side of Telegraph Hill, South Boston, covers with its embankments an area of about 126,000 square feet. It resembles in shape a segment of an ellipse, and has a water area, when at high-water mark, of 70,041

square feet, and a capacity of 7,508,246 gallons. This reservoir is now used for storage, and is connected with the distributing pipes only in case of fire, or accident to the pumping-mains.

The "East Boston Reservoir," on Eagle Hill, East Boston, is bounded westerly by Brooks and southerly by White street. The land covered by and appurtenant to it comprises about 216,027 square feet. Its water area, when at high-water mark, is 44,100 square feet, and its capacity, 5,591,816 gallons.

It was built specially for the high-service supply, and will hold 7,200,000 gallons above a plane 2½ feet above the bottom of the outflow pipe. The area of the water-surface, when at high-water mark, is 64,033 square feet, and its elevation 219 feet above tide-marsh level. A strip of land 25 feet wide leading from Fisher avenue, and containing 2,887 square feet, was purchased for a route for the pipes to the reservoir.

The main pipes leading from the receiving reservoirs in Brookline, Brighton District, and Newton, to this city, and the distributing pipes laid in the city proper, East Boston, and South Boston, Roxbury, Dorchester, West Roxbury, and Brighton Districts, aggregate in length 367 miles, varying in size from 3 inches to 48 inches in diameter.

This lot was placed in charge of the Cochituate Water Board by an order of the City Council of 1870. It contains 114,360 square feet.

The report of the Boston Water Board to the City Council, for the financial year 1883–84, contains an account of the water-pipes and other stock on hand, and a full statement of the condition of the works.

## MYSTIC WATER-WORKS.

The upper portion of Mystic lake, which is the source of supply, is situated in the towns of Medford, Arlington, and Winchester, 6½ miles from Charlestown square. It has an area of about 200

acres when flowed to the level authorized by the act to take water, and a storage capacity of that level of 380,000,000 gallons. The area of country forming the drainage-basin is 27.75 square miles. To convey the water of the lake to the citizens the works consist of dam and overfall; conduit with its appurtenant gate-houses, waste-weir and ventilator; cast-iron main under Mystic river; engine-house; pumping-engines; force-mains; reservoir with influent and effluent chambers; supply mains and city distribution pipes, hydrants, gates, etc.

The dam is 1,560 feet long, built of earthwork and masonry, and its height is 11 feet above high-water mark of Boston Harbor. The conduit is 7,450 feet in length, constructed of hydraulic brick masonry 8 inches thick. It is oviform in shape, 5 feet 8 inches high, and 5 feet wide, interior dimensions. The cast-iron mains, two in number, conveying the water from the pipe-chamber at the end of the conduit to the engine-house, are 487 feet long and 3 feet in diameter.

The engine-house is situated on the southerly bank of and about 200 feet from the Mystic river.

It is a substantial building, 120 feet long and 58 feet wide, constructed of faced brick and freestone, and embraces under one roof the boiler and engine rooms, repair-shop, and pump-well. The lot of land about the engine-house is about 12 acres, and upon a portion of it is a dwelling-house for the engineers, and also a stable. Connected with the engine-house is a brick and stone coal-shed, having a capacity of 1,000 tons.

In the engine-house are three of Worthington's Duplex Pumping-engines, two of 5,000,000 gallons each and one of 8,000,000 gallons' capacity, per 24 hours. Eight boilers supply the steam for pumping the water.

The force-mains are of cast iron, each 30 inches in diameter and 3,277 feet in length. The reservoir is on Walnut Hill, in Medford, near Tufts College.

Its water surface covers an area of $4\frac{1}{3}$ acres, being nearly a parallelogram in shape, 560 feet by 350 feet.

High-water line is 147 feet above tide-marsh level, and at this grade its capacity is 26,244,415 gallons.

The whole lot of land connected with the reservoir belonging to the city is about $10\frac{1}{2}$ acres.

The whole length of distribution pipes in Charlestown is about 30 miles. The whole length of distribution pipes supplied by the Mystic works is about 146 miles. The city owns also a lot of land containing 12,807 square feet, on Medford street, with a substantial brick stable upon it. This land is used for a pipe-yard.

A two-story brick building, $38 \times 40$, built during the year 1882–83, for use as a workshop, is located on land of the city at the corner of Medford and Tufts streets.

Mystic Sewer. — The Mystic sewer extends from Prospect street in Woburn to Lower Mystic pond in West Medford, a distance of 18,892 feet. The sewer was built to intercept the objectionable drainage from the tanneries, and discharge it into the lower pond at the head of the tide-water. The area of land taken

under the act of the Legislature for the construction of the sewer and branch drains was 97,245 square feet.

The cost of construction of the Mystic Water-Works up to the 30th April, 1884, is $1,648,452.35.
